

Re: SOC 2 Bridge Letter for Momentum Labs, Inc.'s Low-Code Workflow System

To Whom It May Concern:

This bridge letter provides an update regarding Momentum Labs, Inc.'s ("Momentum" or "the Company") Low-Code Workflow System and related controls for the period February 1, 2025 through April 30, 2026 (the "bridge period"). This letter should be read in conjunction with Momentum's SOC 2 Type 2 report covering the period February 1, 2024, to January 31, 2025, as issued by Insight Assurance LLC on April 25, 2025.

We are currently undergoing a SOC 2 Type 2 examination for the period February 1, 2025 to January 31, 2026, which will provide an independent assessment of our controls and their operating effectiveness.

Management Assertion

As of April 10, 2026, Momentum's management confirms that:

1. We are not aware of any significant changes to the Low-Code Workflow System or the control environment that would adversely affect the achievement of our service commitments and system requirements based on the trust services criteria relevant to Security during the bridge period.
2. The controls stated in our SOC 2 Type 2 report have continued to operate effectively during the bridge period to achieve our service commitments and system requirements based on the applicable trust services criteria.
3. We continue to monitor our control environment and perform periodic assessments to ensure the continuing effectiveness of our controls.
4. We remain committed to maintaining a strong control environment and will continue to evaluate and enhance our controls as needed.

Limitations

This bridge letter is not a substitute for a SOC 2 examination. It represents management's assertion regarding the status of the control environment during the bridge period and should not be considered as independent third-party validation.

If you have any questions regarding this bridge letter or our control environment, please contact:
